INVENTORY

We deal in Aircraft Spares, Avionics, Tools, Ground Handling units, Equipment & General items. We have direct access to OEM's inventory of Aircraft tires over 40 different sizes, Various PBE models, Wheels, Brakes, LRUs, Lamps, Emergency Equipment etc. We support all types of aircrafts, both fixed wing and rotor.

We have a global supply chain from MROs and OEMs, allowing us to supply in all conditions, New, Surplus, Overhauled, Serviceable and As-Removed. We understand the global need in Aviation, we operate internationally, shipping parts worldwide.

AVIATION RESOURCE MANAGEMENT SYSTEM

- The aviation resource management system is a turnkey cloud platform comprised of 13 modules that cover every aspect of operations, as well as the unified database that integrates them. No more trying to interconnect disparate applications not designed to work together. No more re-keying information to send from one system to another, wasting valuable time and making your organization vulnerable to errors. Data from these modules is delivered automatically to enable better long-term planning and near-term decision making.
- **Network Commercial Planning Sub-System (CPSS)**
Optimizes utilization of fleet resources while maximizing potential yield for each sector and the network as a whole. This is where the Network Schedule is born and is continuously groomed to ensure maximum yield.
- **Flight Operations Sub-System (FOSS)**
Forms the natural network behind an Operation Control Center (OCC) of an airline, keeping every operational element in sync with each other, allowing for complete control over operations, keeping full visibility of fleet movement in the real-time, managing disruptions optimally and efficiently, while minimizing risks. Fleet situational awareness for all. Manage on-time performance and disruptions efficiently.
- **Flight planning and Dispatch Sub-System (FPDS)**
Everything flight dispatchers and crew need, to plan optimally, dispatch and operate flights safely and efficiently, with special focus on overall cost reduction and fuel conservation.
- **Crew management Sub-System (CMSS)**
Ensures adequate and qualified crew are available to cover operational tasks; achieving a perfect balance between crew costs and crew quality of life. Ensures strict statutory compliance and uncompromising safety.
- **Crew Web Portal (CWP)**
An interactive and intuitive web browser interface for anytime, anywhere access enabling workflow automation, interaction and process efficiency for crew who are always on the move.

- **Tab Enabled Solution**
Make optimum use of your aircraft resources and maximize the network effectiveness.
- **Mobile Enabled Solution**
Fleet situational awareness for all. Manage on-time performance and disruptions efficiently.
- **Engineering and Maintenance Sub-System (EMSS)**
Keep your aircraft in a maximum state of airworthiness and ensure quality, compliance and dispatch reliability.
- **Logistics and inventory Management Sub-System (LIMS)**
Ensure just-in-time availability of spares and optimize your inventory.
- **Flight Data Monitoring and Analysis Sub-System (FDMA)**
Analyze all recorded and transmitted data for safety, compliance and efficiency of operations.
- **Fuel Consumption Analysis MIS (FCAM)**
Maximize your profit by operationalizing your fuel conservation program.
- **Safety and Quality Management Sub-System (SQMS)**
Make no compromises on safety of quality; stay compliant with ICAO SMS requirements.
- **Heavy Maintenance Repaire and Overhaul System (HMRO)**
Plan and execute heavy checks efficiently to return air craft back to service on schedule.
- **Integrated Training Management System (ITMS)**
Ensure skills and knowledge levels of the work force are always current and optimal.

KEY BENEFITS

- Only solutions in the industry capable of integrating and optimizing all functions or airline operations.
- Modular, scalable and fully hosted.
- Analytics optimizers across airline operation.
- Keep the back office simply connected while reducing costs and enhance business intelligence.

CAPABILITES
